Drain

Nr.	Description	Article number
B1	Pop Up Drain	D3
B2	Drain pipe	XBG-L

NO - Undersøk badekaret for skader før montering

SE - Inspektera badkaret för skador före installation

PL - Przed montażem sprawdź wannę pod kątem uszkodzeń

GB - Inspect the bathtub for damage before installation

INSTALLATION

Step 1

Step 2

INSTALLATION

Step 3

- NO** – Plasser bunnventilen i avløpshullet
- SE** – Placera bottenventilen i avloppsöppningen
- PL** – Umieść zawór dolny w otworze odpływowym
- GB** – Fit the drain body into the drain hole, and hold it.

Step 4

- NO** – Monter avløpsslangen. Stram forsiktig
- SE** – Montera avloppsslangen. Dra åt försiktigt
- PL** – Zamontuj wąż odpływowy. Delikatnie dokręć
- GB** – Fit the drain with sleeve, then drain pipe onto the drain stopper
Tighten carefully

Step 5

NO - Juster bena slik at badekaret er i vater

SE - Justera benen så att badkaret står stadigt på samma våglängd

PL - Dopasuj nogi, aby wanna była w poziomie

GB - Adjust the legs so that the bathtub is leveled

Step 6

Step 7

- NO** – Dersom badekaret ikke står stødig, påfør eventuelt litt silikon under bena
- SE** - Om badkaret inte står stadigt, applicera eventuellt lite silikon under benen
- PL** - Jeśli wanna nie stoi stabilnie, nałóż trochę silikonu pod nogi
- GB** – If the bathtub is not stable, apply some silicone under the feet

Maintenance

NO - Badekaret er laget av akryl og kan rengjøres med en fuktig klut og vann med et mildt rengjøringsmiddel. Husstandsrengjøringsmidler med aggressive, klorerte og/eller abrasive ingredienser bør ikke brukes da dette kan skade utsiden på badekaret. Kalk kan fjernes med produkter basert på sitronsyre. Bruk aldri eddiksyre ettersom dette vil skade overflaten.

SE - Badkaret är tillverkat av akryl och kan rengöras med en fuktig trasa och vatten med en mild rengöringsmedel. Hushållsrengöringsmedel med aggressiva, klorerade och/eller slipande ingredienser bör inte användas, eftersom det kan skada ytan på badkaret. Kalkavlagringar kan bäst tas bort med en produkt baserad på citronsyra. Använd dock aldrig ättiksyra, eftersom det kan skada akrylytan.

PL - Wanna wykonana jest z akrylu i można ją czyścić wilgotną ściereczką i wodą z dodatkiem delikatnego detergentu. Nie należy używać domowych środków czyszczących zawierających agresywne, chlorowane i/lub ściernie składniki, ponieważ spowoduje to uszkodzenie powierzchni wanny. Osady wapienne najlepiej usunąć preparatem na bazie kwasu cytrynowego. Nigdy jednak nie używaj kwasu octowego, ponieważ spowoduje to uszkodzenie powierzchni akrylowej.

GB - The bathtub is made of acrylic and can be cleaned with a damp cloth and water with a mild detergent. Household detergents with aggressive, chlorinated and/or abrasive constituents may not be used because this will damage the surface of the bathtub. Limescale can best be removed with a product based on citric acid. However, never use acetic acid, the acrylic surface material will be irreversible damaged.
