

MOUNTING INSTRUCTION

DRAWER SYSTEM (PART ONE)

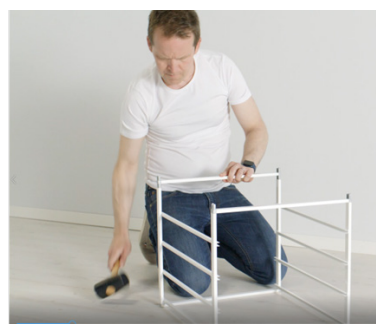

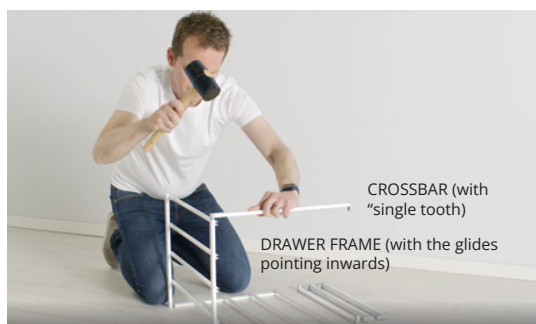

A floor based system built on frames, crossbars, and drawers. Can be placed in e.g. closets and laundry rooms - freestanding, and on wheels. Combine drawer units and add accessories to build a storage system fitting your needs and space e.g. under a staircase. Drawers can be used in existing wardrobes or cupboards, when slid into runners, mounted onto the wardrobe side walls.

You need the following to assemble your solution:

- Mallet

Before mounting, make sure to secure that you are working on a non-sensitive surface – for example on a carpet or on a floor that withstands the assembly work.

START BY FASTENING THE CROSSBARS TO THE FRAMES

1. Start by fastening the first crossbar to the first drawer frame, using the mallet. Use the crossbar with the “single tooth” (and a flat top). Again, secure that the surface you are working won't be damaged.

Secure that the “glides” on the frame are pointing inwards. Also secure that the frame isn't upside down (the top of the frame is where the upper glide is closest to where the frame ends).

2. Fasten the second crossbar and frame.

3. Turn the structure upside down and repeat the process with the crossbars with “double teeth”.

The crossbar with “double teeth” is used to fasten the casters (rolling) or the translucent feet (stationary).

ROLLING DRAWER SYSTEM

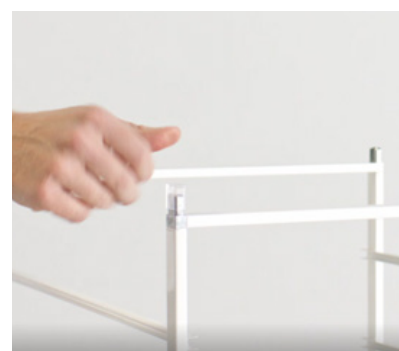

1. If you have chosen to have wheels/casters on your drawer system, attach these. First fasten the rubber box-shaped part onto the crossbar teeth.

2. Then click in the casters into the hole in the rubber box.

STATIONARY DRAWER SYSTEM

1. If you have chosen to have a “stationary” drawer system, attach the translucent feet by firmly pressing them onto the crossbar.

MOUNTING INSTRUCTION

DRAWER SYSTEM (PART TWO)

MELAMINE TOP SHELF

1. If you intend to have a Melamine top shelf on your drawer system, start by fastening the small double-sided tape strips on the top of the structure (in the corners).

Reminder: Remove the safety foil on the upper side.

2. Then carefully position the Top shelf onto the structure.

COMPLETE WITH DRAWERS

1. Finally slide in the drawers and fasten the in/out stops to prevent the drawers from sliding further than you want.

MOUNT TWO DRAWER SYSTEMS ON TOP OF EACH OTHER WITH THE CROSSBAR EXTENSION KIT

1. When mounting a drawer system on top of another drawer system, use the Crossbar extension set.

2. Attach the second frame with the mallet.

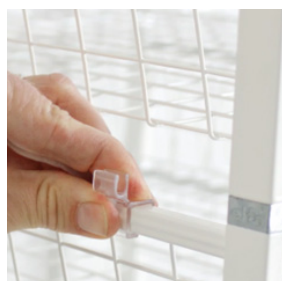

MOUNTING A CLOSET ROD AND/OR A WIRE SHELF BETWEEN TWO DRAWER FRAMES

1. If you wish to have a closet rod between two drawer frames, snap the rod holders onto the side of the drawer frames.

2. Firmly press the closet rod into the rod holders.

1. When mounting a wire shelf between two frames, use the Wire shelf clips and fasten them to the frame.

1. Then press in the wire shelf.
